What is an Invisalign Open Day?

An Invisalign Open Day gives an opportunity for patients to visit us for a full, free consultation with one of our dentists to see if they are suitable for Invisalign treatment.

We will have the latest technology to scan your teeth and show you a glimpse of your future smile!

When and where is it?

Our Invisalign Open Day will be held on Saturday 26th March at our practice on 14 Union Quay, Cork City. [View on Google Maps!](#)

What costs are involved?

Invisalign starts at €2,650 for 'Invisalign Express' (used for very small movements using only 7 aligners), 'Invisalign Lite' and 'Invisalign Go' is €3,680 for 14-20 aligners, and 'Invisalign comprehensive' is €4,900 for more complex cases. Most of our patients fall into the 'Invisalign Lite / Invisalign Go' bracket. This is determined from Invisalign doctors and engineers and can be determined on the day during your one to one consultation.

On the day, we will be offering €300 off from the quoted fees above for patients paying deposits on the day.

What do I receive for the quoted fee?

First of all, the fee never changes, nor are there any added costs (unless separate treatment needs to be carried out such as fillings, extractions etc) which are priced individually and are on our website.

What you'll receive for your Invisalign treatment is:

- Outcome simulator
- All of your visits and Invisalign aligners
- Virtual Care pack
- A full clinical check up (worth €50)
- Philips Zoom professional whitening (worth €299)
- Removable retainers after treatment has been complete (included in Philips Zoom whitening price listed above)

€349 worth of
treatments
added

**All Invisalign treatments are subject to 20% tax back from revenue and we will provide you with a Med2 form to help you with this.*

What happens after my consultation?

So, once you're happy with the outcome simulation of your future smile, we will send the digital file off to Invisalign. Once received, they will have dentists and engineers working on your case. They will create a clinical simulation of your smile called a 'Clincheck'.

In the meantime, we will schedule a full check up to ensure your oral health is suitable for orthodontic treatment. If the exam doesn't show that any restorative work needs to be carried out, we can proceed to the 'Clincheck' stage.

Occasionally, some restorative work needs to be carried out prior to invisalign treatment. The reason why it cannot be during treatment is due to your aligners being created from a scan of your teeth and if they change in shape it will affect the fit of your aligners and ultimately not working for you as planned.

The Clincheck will give you the real results of what Invisalign will do for you. It has been designed by engineers and dentists to give realistic results that will be achieved.

Once you're happy at this short appointment, this is the step where we order the aligners to be manufactured for you!

Almost there!

Next is the visit to fit your aligners, this is a longer appointment. At this visit, you will be fitted with your first aligner, and be given your next couple of sets to take with you and swap out at the prescribed intervals.

For the next few months, you'll attend the clinic regularly for some short appointments to make sure everything is going to plan. You will be well used to us!

We look forward to seeing you soon!
